

MALMÖ UNIVERSITY

CERTIFICATE

for

Ken Tamazawa D.D.S., Ph.D.

This is to certify that Dr Ken Tamazawa, born March 25th 1973, has spent the period from August 1st 2003 till March 31st 2005 with us as a visiting dentist.

Dr Tamazawa has at the Department mainly followed our clinical work within the field of "implantology" but also within conventional prosthodontics, including rehabilitation with both fixed and removable prosthetic appliances. He has also got some insight in our treatments with maxillo-facial prosthodontics.

He has taken the opportunity to visit and follow the work at both the Department of Oral radiology and the Department of Oral surgery and oral medicine. He has during these visits gained knowledge of treatment approaches at our dental school by and large and especially when it comes to treatments that include oral implants.

Through his many friends he has also made the best out of his stay and devoted some time to follow the work within private offices.

During his stay with us we have all learnt to know Ken as a very kind person who easily adapts to new situations and fits into new environments.

When Ken now is ending his stay with us I am pleased to be able to give him my very best of recommendations and certainly do wish him nothing but the very best. I look forward in the near future to hearing from him that he has successfully started his own office to treat patients in need of implant-supported reconstructions. As I understand it he also intends to take up his duties within the university. I do wish him success in these commitments too.

Malmö March 31st 2005

Krister Nilner

Professor/chairman

Dept of Prosthetic Dentistry
